RE: Walton Farm Site

Dear Mr. Terril:

I became discouraged with the slow progress in the clean-up of my farm. Believing that the hold up was with the EPA, I contacted my Congressman, James Saxton, and requested that he look into the matter and help me expedite a conclusion. I am enclosing a copy of the correspondence recently received from his office indicating that the EPA is awaiting PPG's submission of a petition to the regional administrator requesting an exemption from the RCRA waste designation.

It is nearly 10 years that I have waited hoping to have this matter resolved. As you probably know, my wife died recently and as a consequence, I am no longer interested in building a home and living on the farm. I wish to place it on the market and cannot do so unless the clean-up is completed. I am, therefore, respectfully requesting that PPG submit the required petition to the EPA so that I can receive some relief from this extremely burdensome situation.

Thank you very much in advance for your consideration.

Sincerely,

Rudolph C. Camishion, M.D.
